Office print · 12 November 2026 · Letter · Black and white

Keep this book in the office. Do not leave the login page on a floor TV.

1 · SIGN-IN ACCOUNTS

Seed accounts are for gym setup. Passwords are handed over in person and are not printed in this book. A person imported from Glofox does not get a shared password. They use Forgot password when that email is turned on. Give each real staff person their own account. Do not share one login across the desk.

Role	Email	Signs in at

Owner and admin can open money and staff accounts. A coach can run class, roster, live mode, messages, and coach notes. A coach cannot open the owner money page. Front desk can scan, override with a reason, run the kiosk, and run the opening check. Youth rounds stay with the coach. The shadow round is adults only.

3 · OWNER MANUAL

Sign in on the staff console before the first member reaches the desk. If the staff page will not load, check the gym internet first.

Morning. Open the owner brief. Read revenue against yesterday, check-ins, classes and how full they are, active members split youth and adult, pending waivers, pending payments, then staff overrides. Every override needs a real reason. Pending waivers and pending payments should be near empty before the evening classes.

Open the gym.

1. The desk computer is the 22-inch STGSivir all-in-one. It stays on the desk. The 50-inch Roku TV goes on the wall. One HDMI cable runs from the computer's HDMI port to an HDMI input on the TV. On the Roku remote, choose that HDMI input and leave it there. The Roku home screen does not run the gym.
2. On the computer, press the Windows key and P, then choose Extend. The 22-inch screen and the wall TV are two different pages.
3. Sign in as the owner on the desk screen, at the staff address.
4. Read the owner brief. Confirm today's classes are on the board.
5. On the wall TV, open the floor address in Chrome and press F for fullscreen. Tap the page once so the bell can play. When two classes are on at once, the wall splits them.
6. On the desk screen, open desk check-in. Click the scan box. Scan one test card before the door opens.

The scanner is a keyboard. It types the code and presses Enter. If the cursor is in the wrong box, the scan is missed. Hold the phone about a hand's width away, brightness up. The code changes about every three minutes.

A person is on the floor only after a scan. Booking a class is not a check-in. The wall TV lists who scanned in, and who booked but has not scanned. If the system blocks them, read the reason. It is usually an unsigned waiver or a membership that is not active. An unpaid or past-due account shows on the desk. An override needs a written reason of more than a word. That reason shows on the owner brief. No signed waiver, no QR. A child card waits for the guardian waiver at Family.

Payments are not live. Contact Glofox, cancel, and request the transfer before any card or bank debit runs here. Card memberships will be Stripe. Bank-debit memberships will be GoCardless. Cash stays on the Sully's desk ledger. Do not bill the same month in Glofox and here. Never write a card number down.

People. Only the owner and an admin open staff accounts. Invite the person, hand them a temporary password in person, and have them replace it. When someone leaves, disable the account before they leave the building. You cannot disable your own account.

Messages from the owner brief go to a group: active members, youth, adults, trial, monthly, or people who still owe a waiver. No medical detail and no card number in a broadcast. The kitchen is not open. Do not take food orders on the system.

Close. Coaches finalize attendance. Read the owner brief once more. Log out of the staff console if the desk computer stays where members can reach it. The last person out is the person who looked at the owner brief.

When it breaks. Both sites down: the building connection is down, and the floor TV can keep the last class. Scan does nothing: click the scan box. No QR: waiver, or the parent for a youth. Floor silent: tap the page once. Wrong class on the floor: the coach starts Live Class Mode for the class that is actually in the room. A frozen owner number: refresh. It should move within a few seconds.

4 · COACH MANUAL

The coach runs the class. The desk runs the door. The owner runs the money. Sign in with that coach's own account. Home is Coach Command, titled Today on the floor.

1. Open today's class before the athletes are in the ring. The floor TV follows Live Class Mode.
2. Read who is checked in, who is still due, and who needs a look. Know the new names.
3. Roster and boxing cards: pick the session, mark attendance honestly, and write the next step on the card. A no-show is a no-show. A void needs a reason.
4. Live Class Mode is the clock. Start when the room is ready. One coach drives the clock. Kids classes stay in kids language. Finish from this page so class XP is awarded. If the TV says the feed dropped, keep the round and tell the desk.
5. Build the workout before class, from Program every bell, and attach it to the class. Do not describe a different workout than the one on the screen.
6. Messages are for that class. Gym-wide notes come from the owner. No card numbers, no medical detail, no other athlete's business.
7. After class, complete Live, finalize the roster, and leave the next coach a clean page.

An athlete who says they paid and is not on the roster goes to the desk. A coach who cannot sign in does not use someone else's account.

5 · LEAVE GLOFOX

Do this while Glofox is still billing. Sully's does not cancel Glofox. Do not bill the same month in both places.

1. Sign in to Glofox. Open Manage, then Clients.
2. Optional: filter to active people if that package allows filters.
3. Actions, then Download. Save the CSV.
4. The header must include email, first name, last name, and should include phone, membership, status, start, and end.
5. Send the file to Quiet Agency in private. Do not post it in a group chat. Delete it after the import is confirmed.

Glofox sign-in
`https://app.glofox.com/`

How to download the client list
`https://support.glofox.com/hc/en-us/articles/46433498252564-How-to-Download-a-Client-List`

A row with no email or no name is skipped. An email already in Sully's is kept. Card numbers are ignored. Waivers, class history, and stored cards do not come across. Youth, kid, child, Little Champ, Jab Lab, or free becomes the youth plan. Everything else becomes the adult monthly plan. Cancelled, expired, inactive, or frozen comes in cancelled. Paused stays paused.

Quiet Agency runs a dry pass, then the write. New people set a password from Forgot password and sign the Sully's waiver before a check-in card will issue.

Dry run, writes nothing

```
node scripts/import-glofox-members.mjs members.csv
```

Write

```
node scripts/import-glofox-members.mjs members.csv --commit
```

The November 11 member file is already in Sully's. 2,445 accounts were added. 177 of them have a current membership. Nobody was emailed. The old Glofox waiver was not copied. A check-in still needs a Sully's waiver.

Next, contact Glofox. Cancel the service and request the transfer of recurring payments. Do not turn Stripe or GoCardless on until that transfer is agreed, and do not bill the same month in both places.

6 · STRIPE AND GOCARDLESS

Payments stay off. Stripe is the card path for memberships. GoCardless is the bank-debit path for members who pay from their account. Helcim is not the processor. The gym system never stores a full card number.

1. Contact Glofox. Cancel, and request the transfer of recurring payments.
2. When that transfer is agreed, connect Stripe for card memberships. Monthly plans become subscriptions. One real charge must match the owner total before members are told card pay is live.
3. Connect GoCardless only for the bank-debit members on that transfer. Do not put those people on Stripe as well.
4. Cash stays on the desk ledger. The desk already flags an unpaid or past-due account and will not scan them onto the floor without a staff override.

Stripe

```
https://dashboard.stripe.com/
```

GoCardless

```
https://manage.gocardless.com/
```

QuickBooks comes after a settled week on Stripe or GoCardless. Do not post the same deposit a second way.

7 · TEST BEFORE YOU ANNOUNCE IT

- [ ] The 22-inch computer is on the gym Wi-Fi. Chrome is open. Windows key and P is set to Extend. The HDMI cable reaches the wall TV, and the Roku is on that HDMI input.
- [ ] Owner sign-in opens the owner brief.
- [ ] Front desk sign-in opens check-in. The cursor is in the scan box. One test QR checks in.
- [ ] Coach sign-in opens Today on the floor, not a member session. Liznell is on the staff list.
- [ ] The wall TV shows the floor page, full screen. Two live classes split side by side. The page was tapped once for sound.
- [ ] A person with no waiver cannot get a QR. A youth card waits for the guardian. A booking without a scan is not on the floor.
- [ ] An unpaid account is named on the desk and does not scan in without an override.
- [ ] A cash drop-in is on the Sully's ledger. Stripe and GoCardless are still off.
- [ ] An imported member can use Forgot password once that email is turned on, then sign the waiver.
- [ ] Nobody is billed in Glofox and here for the same month.

8 · COMPUTER, WALL TV, SCANNER

Nothing is installed on the computer. Chrome is the gym. The 22-inch screen is the desk. The HDMI port feeds the 50-inch TV on the wall.

- Computer: STGSivir All-in-One Desktop, 22-inch FHD display.

- Processor: Intel Core i7, up to 3.9 GHz.
- Memory: 16 GB. Storage: 1 TB SSD.
- Network: Wi-Fi and Bluetooth 5.0. Use the gym Wi-Fi.
- Included: RGB keyboard, RGB mouse, mouse pad, webcam.
- System: Windows 11 Home. Browser: Chrome. No gym software to install.
- Video: one HDMI port. That port goes to the wall TV.
- Floor TV: 50-inch Roku, mounted on the wall. Middle of the screen about standing eye height.
- Cable: HDMI from the computer's HDMI port to an HDMI input on the Roku. Run it along the wall with slack. Power behind the TV.
- On the Roku remote, select that HDMI input and leave it. The Roku home screen does not run the gym.
- On the computer, press the Windows key and P, then Extend. Desk keeps staff check-in. Wall keeps the floor page, full screen.

The member card is a QR code on a phone. A laser gun that only reads printed bars will not read it. Use a 2D imager, USB, that types as a keyboard and adds Enter. Zebra DS2208 is the one-cord counter scanner. Honeywell Voyager XP 1472g is the cordless kit. The base still has to arrive as keyboard input with Enter on the end. Plug the scanner into the all-in-one.

9 · NOT LIVE YET

- Stripe. Card memberships. Off until Glofox is cancelled and the transfer is requested.
- GoCardless. Bank debit. Off until that same transfer says which members pay from their bank.
- Password-reset email. Accounts exist. The email is not turned on, so do not send the member letter yet.
- QuickBooks. After a settled week. It is not connected.
- Glofox billing. The member list is in Sully's. Glofox is still billing until they cancel it.

Support for the system: Quiet Agency, quietagency.co. Gym questions: the owner, then info@sullysboxinggym.com.

Boxing is the engine. People are the purpose. Character is the legacy.
