Gym computer equipment

1554 Dundas St W (lower level), Toronto - for the desktop PC arriving today

This is the list for the desk computer that runs Sully's: staff console, desk scanner, reception screen, and floor TV. It is not a boxing-gear list. One computer drives the desk and both TVs.

ITEM	STATUS	WHAT TO GET / HOW IT IS USED
Desk computer	Have today	Windows 11 desktop. 16 GB memory. Wired network port. Chrome. Skip AI and gaming models. A Lenovo ThinkCentre small desktop is the office choice.
Video outputs	Need 3	Desk screen, reception TV, and floor TV each need their own picture. Two HDMI ports need a third output (USB-C dock or extra HDMI). A splitter copies one picture and cannot give each TV its own page.
Desk screen	Use the PC	The computer's own monitor is the desk. Staff console: http://localhost:3001
Reception TV	One TV	Own HDMI cable from the computer. Reception page, fullscreen (F): http://localhost:3000/tv/reception
Floor TV	One TV	Own HDMI cable from the computer. Floor page, fullscreen (F), tap once for the bell: http://localhost:3000/tv/floor
HDMI cables	Two, labeled	One cable per TV. Label them Reception and Floor. Do not use a splitter.
Wired network	Required	Ethernet from the gym network into the computer. Wi-Fi is a backup only.
QR scanner	USB 2D	Member cards are a QR on a phone. A laser gun that only reads printed bars will not work. USB 2D imager that types like a keyboard and presses Enter. Counter: Zebra DS2208. Cordless: Honeywell Voyager XP 1472g.
Install USB	Bring it	Copy Sullys-FRESH (or the latest install folder) onto the stick. On this PC double-click Install to this PC.bat, then Start Sullys on the desktop.
Helcim terminal	On order	Helcim Smart Terminal. Leave it standalone until it is paired. Do not buy a magstripe reader or a card-number keyboard for the computer.
Keyboard and mouse	Desk	USB. Click the scan box before the first member. The scanner types into whatever is focused.
Speakers	Floor TV	The floor page plays the bell. Tap the page once after it opens. Built-in TV speakers are enough.

Plug in today

1. Put the computer on the desk. Plug in power, ethernet, keyboard, mouse, and the scanner.
2. Plug one HDMI into the reception TV and one HDMI into the floor TV. Label the cables.
3. If Windows asks, allow Node on private networks. Chrome is the browser.
4. Double-click Install to this PC.bat from the USB. When it says Done, double-click Start Sullys on the desktop.
5. Open Floor TV, Reception TV, and Staff. Press F on each TV. Tap Floor TV once for sound. Click the scan box and scan one test card.

Do not run the installer on a home PC. Do not run npm install. Staff passwords are handed over in person. Helcim tap is not live until one real charge matches the owner total.
